Experienced Shopify Developer specializing in scalable multi-store infrastructure and custom eCommerce platforms for international markets. Expertise in implementing advanced UI components and dynamic product logic, having led the development of over 40 international stores that drove improved user engagement and regional conversion rates. Notable achievements include developing a custom CartSense Shopify app to optimize cart abandonment strategies. Experienced in building scalable, high-performance Shopify ecosystems for international markets.

WORK EXPERIENCE

Shopify Developer | Custom App & Multi-Store Specialist

03/2025 – 01/2026

LUMU Pak Brand, Lahore, Pakistan

- Led end-to-end development of the LUMU.pk marketplace using a heavily customized Dawn theme, implementing advanced product cards, interactive UI components, and custom add-to-cart logic.
- Architected scalable metafields and metaobjects structures to manage complex, dynamic product data.
- Engineered reusable UI systems to improve storefront flexibility and user engagement.
- Developed a Remix-based Shopify app utilizing Polaris UI and paid API integrations for automated low-stock monitoring and operational efficiency.
- Designed a secure multi-vendor seller dashboard with custom authentication and scalable admin control layers.

Senior Shopify Developer

04/2024 – 01/2025

Fashionphile, Remote, United States

- Delivered 90% custom storefront rebuild using Dawn OS 2.0 with fully dynamic, modular section architecture.
- Engineered an interactive “Is This Authentic?” in-section experience without page reload, increasing user engagement and session interaction depth.
- Rebuilt blog architecture and implemented live Careers integration for structured content management.
- Implemented metafield-driven merchandising logic and collection-based dynamic sliders.
- Developed the CartSense Shopify app to capture and analyze cart-abandonment behavior, supporting conversion optimization initiatives.

Senior Shopify Developer | Multi-Store eCommerce Engineer

01/2023 – 03/2024

The Kiddospace, Remote, United States

- Directed development of 40+ international Shopify stores (US, AU, CA, DE), managing scalable multi-store infrastructure and deployment workflows.
- Built high-performance custom Shopify themes using Liquid and JavaScript with dynamic product logic and automation layers.
- Optimized checkout UX and implemented cart personalization strategies across global storefronts.
- Executed synchronized releases across 42 live stores, ensuring stability and performance consistency.
- Reduced dependency on third-party apps by engineering custom in-house solutions, lowering operational overhead.
- Led localization strategies for US and DE markets to enhance regional conversion performance.
- Maintained system compliance and uptime during high-volume seasonal scaling events.

EDUCATION

Bachelor’s Degree in Computer Science - Computer Science
University of Engineering & Technology (UET), Lahore, Pakistan
